KC-MET G

KC-MET G-1 & KC-MET G2 - Comprehensive Solution
for Achieving Glycemic Targets

**KC-MET G-1: Metformin Hydrochloride IP
500 mg + Glimepiride 1 mg**

**KC-MET G-2: Metformin Hydrochloride IP
500 mg + Glimepiride 2 mg**

Adults unable to manage blood sugar through diet and exercise alone

KC-MET

KC-MET G-1 & KC-MET G-2

KC-MET G-1 and KC-MET G-2 - Dual-Action Glycemic Control

:

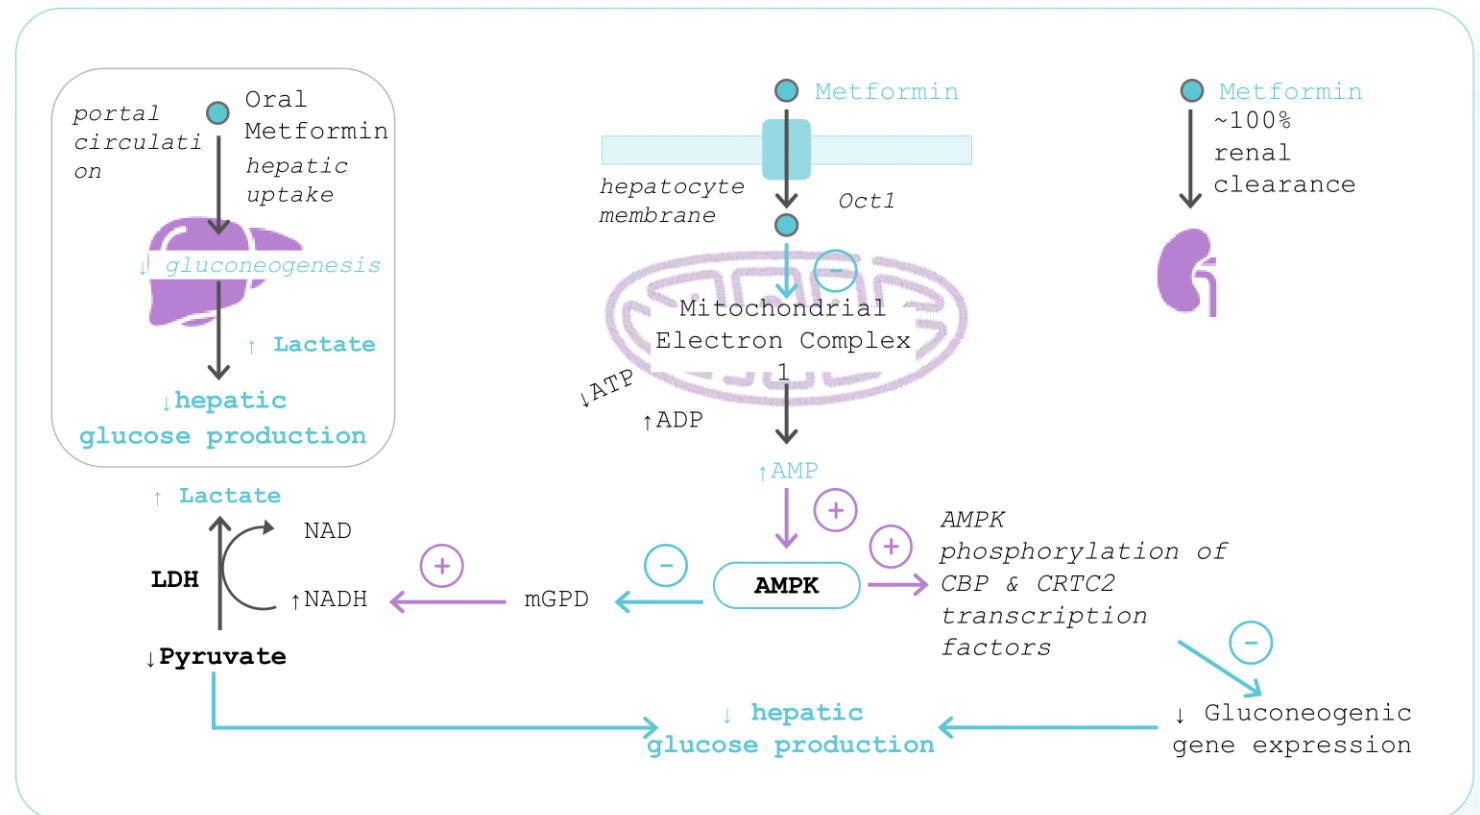

1

Metformin Hydrochloride:

Reduces hepatic glucose formation and improves insulin sensitivity

2

Glimepiride: Stimulates the pancreas to release more insulin

KC-MET G-1 & KC-MET G-2

Dual-Action Glycemic Control

Key Benefits

- › KC-MET G-1/ G-2 provide dual-action glycemic control by addressing both insulin resistance and insulin secretion.
- › Proven efficacy in reducing HbA1c levels and improving overall glycemic control.

Efficacy in Managing Specific Conditions

- › KC-MET G-1/ G-2 lowers blood glucose levels in patients who are inadequately controlled on Metformin alone.
- › Helps prevent the progression of diabetes-related complications.

Unique Selling Points Compared to Other Treatments

- › KC-MET G-1/ G-2 provides **OD** dose advantage
- › Offers flexibility in dosing with two available strengths

KC-MET G-1 & KC-MET G-2

Dual-Action Glycemic Control - Case Studies

Case Study

A 55-year-old male patient with type 2 diabetes and an HbA1c of **8.5%** was able to reduce his HbA1c to **6.8%** after 12 weeks on KC-MET G-2, with good tolerability.

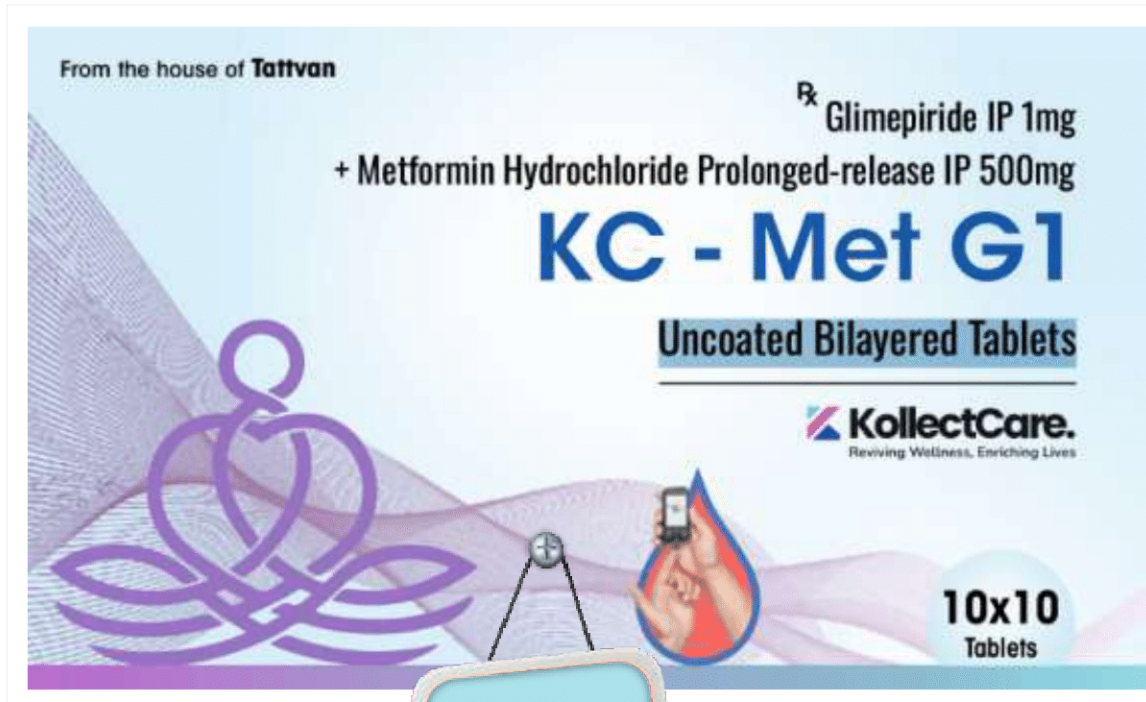

Switching to **KC-MET G-1** has made my diabetes management much easier, and my blood sugar levels have been more stable."

KC-MET G MAX

KC-Met G1 MAX & KC-Met G2 MAX

KC-Met G1 MAX: Metformin Hydrochloride
IP 1000 mg + Glimepiride 1 mg

KC-Met G2 MAX: Metformin Hydrochloride IP
1000 mg + Glimepiride 2 mg

For patients with insufficient glycemic control on lower doses

KC-Met G1 MAX & KC-Met G2 MAX –

Enhanced Glycemic Control

KC-Met G1 MAX & KC-Met G2 MAX

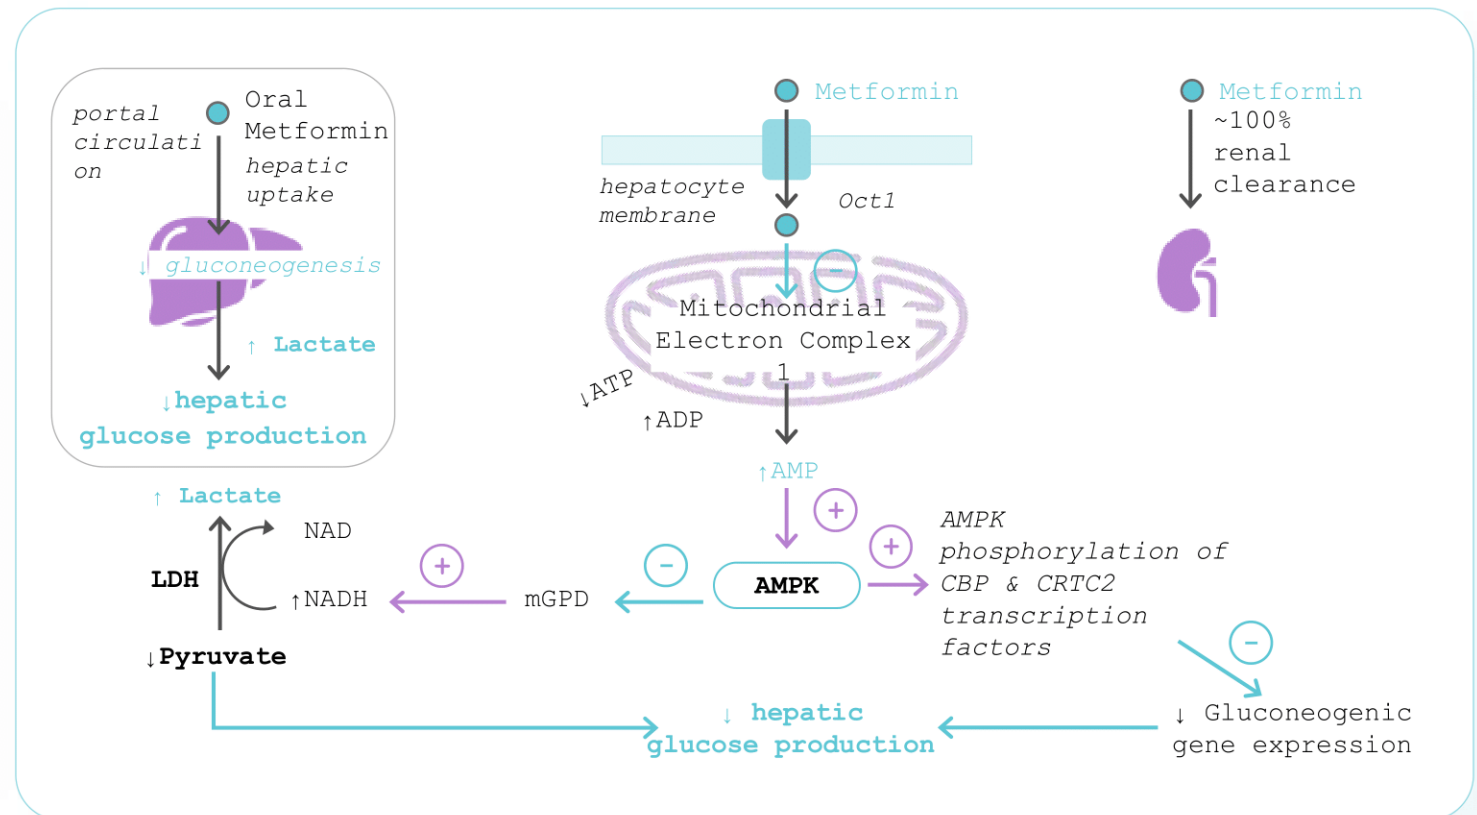

1

Metformin Hydrochloride:

Reduces glucose production in the liver & Lowers fasting blood glucose.

2

Glimepiride: Enhances insulin secretion by binding to ATP-sensitive potassium channels on pancreatic beta cells.

KC-Met G1 MAX & KC-Met G2 MAX –

Enhanced Glycemic Control

KC-Met G1 MAX & KC-Met G2 MAX

Key Benefits

- › KC-Met G1 /G2 MAX provide enhanced glycemic control by combining high-dose Metformin with Glimepiride, targeting both insulin resistance and insulin secretion.
- › Controls postprandial (after-meal) blood glucose levels

Efficacy in Managing Specific Conditions

- › Effective in lowering blood glucose levels in patients who are inadequately controlled on lower doses of Metformin or dual therapy
-
- › Helps prevent the progression of diabetes-related complications through improved glycemic control.

Dosing Benefits

- › KC-MET G-1/ G-2 MAX provides **OD** dose advantage
- › Offers flexibility in dosing with two available strengths

KC-Met G1 MAX & KC-Met G2 MAX

Enhanced Glycemic Control - Case Studies

KC-Met G1 MAX & KC-Met G2 MAX

Case Study

A 58-year-old female patient with type 2 diabetes and an HbA1c of 8.7% was able to reduce her HbA1c to 6.9% after 12 weeks on KC-Met G2 MAX, with good tolerability.

"Using **KC-Met G1 MAX** has made a significant difference in managing my blood sugar levels. I feel more in control of my diabetes."

In uncontrolled diabetes patients with high PPBG

Gli Tri-1 & Gli Tri-2

Powerful Triple-Action Glycemic Control

Gli Tri-1mg & Gli Tri-2mg

1

Metformin Hydrochloride:

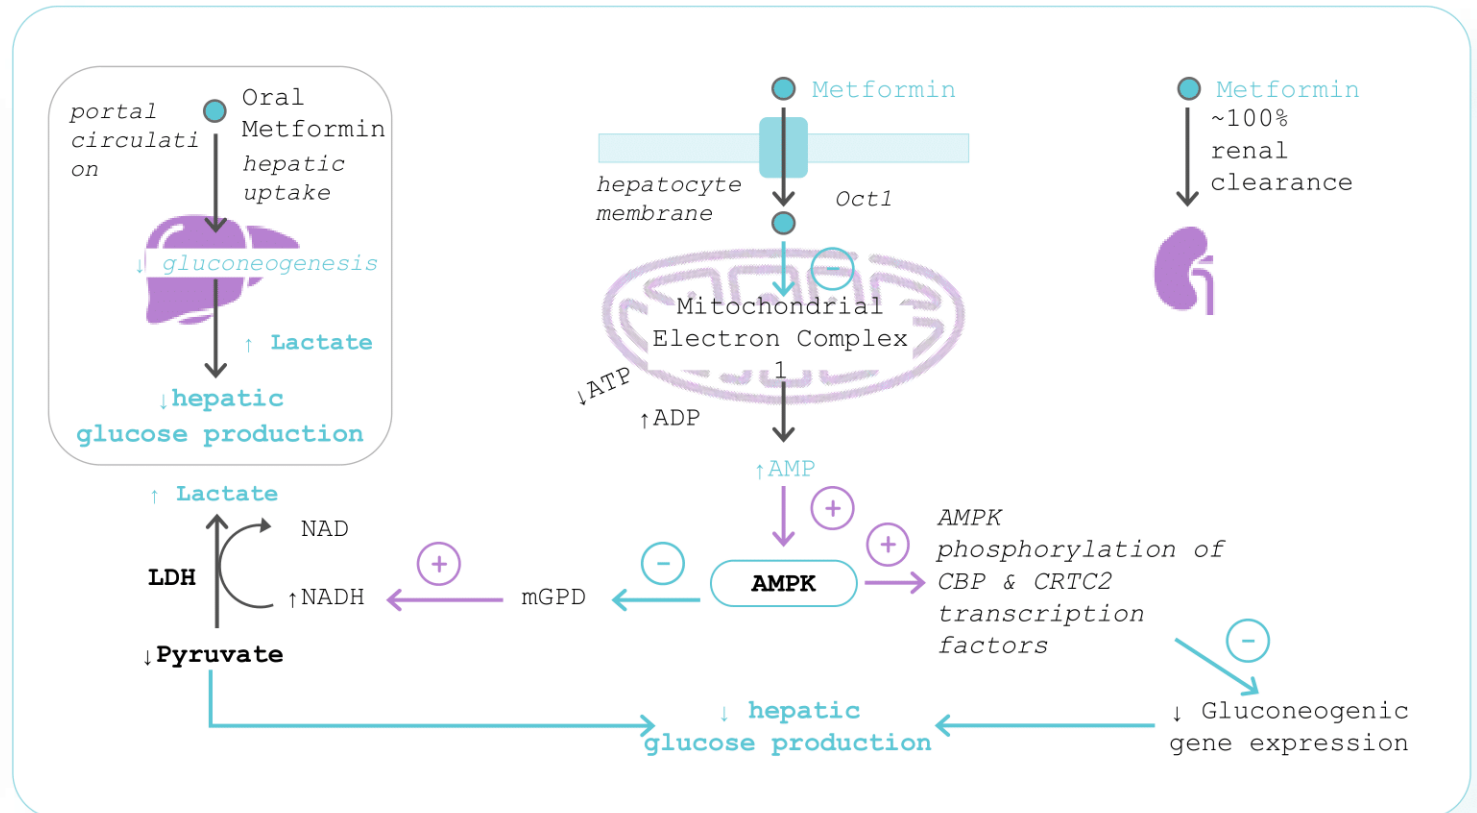

Reduces liver glucose production and enhances insulin sensitivity

2

Glimepiride: Stimulates insulin secretion by targeting potassium channels on beta cells.

3

Voglibose: Slows carbohydrate digestion and glucose absorption by inhibiting alpha-glucosidase enzymes.

In uncontrolled diabetes patients with high PPBG

Gli Tri-1 & Gli Tri-2

Powerful Triple-Action Glycemic Control

Key Benefits

- › **ADDITIVE REDUCTION**
In **PPBG**
- › **ADDITIVE REDUCTION**
In **HBA1c**

Efficacy in Managing Specific Conditions

- › Effective in patients inadequately controlled on dual therapy.
- › Reduces the need for higher doses of individual drugs

Dosing Benefits

- › Triple-action with OD dose advantage.
- › Available in two strengths to tailor therapy according to individual patient needs.
